SETRHI-SETAE, a subsidiary of the Artelia Group, becomes SANAE

Created in 1975, SETRHI-SETAE became a subsidiary of the Artelia Group in 2013 and since 1 January 2015 has taken the name SANAE, a brand of Artelia's Building Construction and Industrial Facilities sector.

Proud of its expertise in the design of healthcare buildings, the entity has adopted the name SANAE from the Latin *sano*, *sanare* (to heal or make healthy).

This choice expresses its core values:

- commitment to the quality of patient care through functional buildings,
- expertise in all areas of design and construction supervision: master plans, engineering, project management,
- energetic research and development concerning tomorrow's healthcare facilities, in step with the latest innovations.

SANAE's teams will be drawing more than ever on the other areas of expertise found within Artelia, France's foremost independent engineering group, to offer clients a wider range of services (complex buildings, sustainable development, BIM, etc.) and consolidate its leading position in the design of healthcare buildings.

SANAE has worked on many prestigious projects, such as the Bezannes polyclinic (480 beds and places) and the new Nouville clinic in Nouméa (280 beds). SANAE has also been chosen for major hospital merger projects in Paris and Lyon, such as the Lyon-Villeurbanne Médipôle (708 beds), the largest private healthcare facility currently being built in France.

A word about Artelia
www.arteliagroup.com

Artelia is an international, multidisciplinary group specialising in engineering and project management in the construction, infrastructure and environment sectors. With a staff of 3,200 and annual turnover of € 352 million, it ranks as one of France's foremost firms in the sector. The group has an international network of 42 offices in Europe, Africa, the Middle East, Asia and South America. Artelia is more than 95% owned by its managers and employees.

France's leading engineering company in the field of building construction, Artelia meets the expectations of a constantly changing world, which calls for expertise, creativity and responsiveness in addition to experience. The group operates in all areas of building construction, in particular those requiring leading-edge techniques, healthcare facilities and laboratories, for which Artelia has outstanding references.
