With teams consisting of technical specialists and project managers, Artelia assists its clients with designing or renovating all types of building.

High-rise buildings, hotels, health-care facilities, shopping centres, cultural and sports facilities: Artelia assists its clients with designing and building all types of building.

Drawing on top-level project managers and specialists in a wide range of fields, Artelia offers its clients engineering solutions that are suited to each situation, taking their issues into account, such as achieving higher environmental performance levels, developing mixed-use programmes, adapting to complex urban settings, dealing with multiple contractual arrangements and integrating BIM.

The Group hence has all the skills at its disposal to design efficient buildings that promote the wellness of their occupants and have a smaller environmental footprint.

Artelia is also able to provide EPC or general contracting services and take a leading role in Public-Private Partnership consortiums.

Drawing on the full potential provided by new technologies, Artelia develops innovative solutions covering a wide range of services: risk management, safety and security, smart buildings, timber engineering, certification, etc.
