Globalisation, exemplary environmental performance, new consumer expectations: these are just some of the challenges industrial players are faced with every day as they strive to improve their economic and environmental performance levels and manage all types of risk.

In its capacity as a one-stop contact for its clients, Artelia provides solutions for major industrial clients throughout the world, drawing on its wide range of expertise and dense geographical network.

Artelia is also attentive to its clients’ needs to provide on-hand services and solutions adapted to the particular features of each industrial project.
INDUSTRIAL FACILITIES
- Production units in all sectors of activity
- Assembly buildings, maintenance workshops
- Logistics centres, courier services, multimodal hubs
- Offices

INDUSTRIAL PROCESSES
- Capacity analyses
- Ultra-clean rooms, ultra-sensitive environments
- Pharmaceuticals and cosmetics
- Food processing
- Aeronautical equipment
- Fluid networks, pressurised circuits
- Cooling systems, water intakes, pumping stations

NUCLEAR INDUSTRY
- Nuclear power plants
- Reprocessing units
- R&D laboratories
- Nuclear waste repositories
- Very large research infrastructure

LABORATORIES
- Medical and hospital laboratories
- Research laboratories
- Ultra-clean laboratories
- Sensitive laboratories

INDUSTRIAL ENVIRONMENT
- Statutory compliance
- Environmental impact assessments
- Environmental monitoring plans
- Audits, due diligence
- Asbestos removal, dismantling, deconstruction, pollution remediation

INFRASTRUCTURE AND UTILITY NETWORKS FOR INDUSTRIAL SITES
- Specialised terminals
- Ports, railways, roads
- Energy production
- Handling and lifting
- Offshore industrial intakes and outfalls
- Water supply structures
- Energy, electricity (power & lighting / signal & communication networks)
- Solid waste and effluents
- Air quality, noise, odours
- Industrial cooling
- Development of surrounding areas, roads & utilities

OPERATIONAL RISKS AND SAFETY
- Analysis of system/project risks
- Natural risks (earthquakes, floods, etc.)
- Technological risks
- In-service support (ISS)
- QHSE studies
- Emergency and contingency plans

GENERAL INDUSTRIAL ENGINEERING
- Processes and calculations
- General installations, piping
- Structural framework
- High and low voltage networks
- Instrumentation
- Control systems
- Mechanical equipment, tools
- Special machines
- Offshore structures
- Industrial ventilation systems
- Safety systems for installations
- Management of major industrial outages
Artelia, a multidisciplinary and independent international group

Engineering - Projet management
Consultancy - Audits
EPC - Turnkey

BUILDING CONSTRUCTION - MULTI-SITE PROJECTS - INDUSTRY - WATER - MARITIME - ENVIRONMENT - ENERGY - TRANSPORT - URBAN DEVELOPMENT

The Artelia Group has been granted the following certifications*: ISO 9001-2008 | ISO 14001 | OHSAS 18001
